

How to attach the Disposable Chip to your shoe?

Thread the shoelace through the middle hole at the top and make sure it is secure.

Do **NOT** attach the clip like a paperclip or else it will fall off.

Pull the chip towards the shoe and tie the shoelaces on top of the chip.

Ready to go.

Make sure that the chip is on top of your foot and not hanging on the side. If the chip is not placed correctly, registration cannot be guaranteed.

Do not tie the chip into the lace; when it comes loose, the chip may easily be lost.
